GraphicConverter FAQ No. 4

Question:

How do you launch GraphicConverter in 32 bit mode (required for opening some old file formats and support of old scanner drivers)?

Tutorial:

- Select the GraphicConverter application in the Finder.
- Select "File/Get Info" in the Finder menu.
- Check the option "Open in 32-bit mode"
- Close the window.
- Launch GraphicConverter. It will now display 32 bit in the about dialog.
